

Things to look for when buying a new computer

Desktop/ Laptop

1	Processor	Intel Processors i3, i5, i7 - the higher the number the better - AMD is the cheaper brand
2	Ram / Memory	The more the better. 4GB + - Like seeing 6 -8 GB - make sure it is upgradeable
3	Hard Drive	Most will come with 500GB but some are now 1TB - this is lots of room for files/ photos ect.
4	Screen	Laptops - choose a screen size that suites your needs - Touch screen is cool.. But will you use it? Not necessary
5	Makes	Desktop - Asus, Acer, Lenovo, Dell, HP Laptop - Asus, Acer, Lenovo, Dell (NO HP - Hindge issues)
6	Network	Laptop - wireless will be included Desktop - Is there a wireless card? Will you need one?
7	CD/DVD	Laptops often come without a CD drive. Do you need one? If you only use it occasionally and there is no drive... you can buy a portable USB CD/DVD drive.
8	Operating Sys.	Your machine will come with Windows 8 (old stock) or Windows 10 for new stock. You can update to windows 10 when you get it.
9	USB	You will need a 16 or 32 GB USB drive to backup your operating system... this is your copy of windows.
